

VICINITY MAP

Project Location

**State Project No. 713-50-0107
Refinery Road Bridge Over Bayou Teche
City of Breaux Bridge
St. Martin Parish
(Estimated Construction Cost: \$2,500,000)**

The existing structure is classified as structurally deficient with a load posting of 5 tons. The new bridge will add long term economic value to the area by allowing heavy traffic (trucks) to access the industrial areas over Bayou Teche. This project during construction will add a short term stimulus to the economy by creating a demand for local concrete, formwork, labor and equipment.
